

*Shinji*

*Ideas and culture develop through the environment created by an era and permeates the region.*

*Today the world is negating and destroying the culture that has brought together and permeated the region.*

*This is why the world is engaged in conflicts and skirmishes having forgotten the kokoro to come together and harmonize; hence it is unable to cope with the changes.*

*Unable to achieve happiness and prosperity, this is the cause of the suffering.*

*To the Shinja*

*Learn the teachings with family members and strive to create a family that is sustained by the principles.*

*The kokoro of family members will gradually come together, support one another, and family members will begin to see what life should be about.*

*Hence, they will not be consumed by the changes in society and will live their lives in sync with the flow.*

*They will not experience sickness, accidents, or disasters and will live each day with hopes and dreams.*

*Kami teaches humanity the wisdom to achieve a life filled with meaning and purpose.*

*When human beings learn the principles from these teachings, their kokoro will be protected and they will attain kaiun.*

*If you look closely at today's society through the teachings as you live your life, your troubles will disappear, and you will be protected and saved.*
